**Manual Test Plan for ScopeX Fintech App**

# 1. Introduction

This document outlines the manual test plan for the **Login Page** and **Add Recipient Page and logout** in the ScopeX Fintech App. It defines the test objectives, scope, test scenarios, and expected outcomes to ensure that these functionalities work correctly.

# 2. Test Objectives

- Verify the functionality, usability, and security of the **Login Page**.
- Ensure the **Add Recipient** feature works as expected.
- Ensure the **logout** feature works as expected.
- Validate error handling and input validations.
- Check cross-browser and device compatibility.

# 3. Scope

- **In-Scope**:
    - User login with valid and invalid credentials.
    - Password reset functionality.
    - Adding a recipient with required bank details.
    - Verification of error messages for incorrect inputs.
- **Out of Scope**:
    - Performance and load testing.
    - Integration testing with backend services.

# 4. Assumptions

- Test environment mimics the production environment.
- Test data is available for login and recipient details.
- Users have valid credentials for login testing.
- Required APIs are stable and functional.

# 5. Test Data

## 5.1 Test Data for login page

Valid EmailID = [shalizacurd@gmail.com](mailto:shalizacurd@gmail.com)

Password = **********
Invalid EmailID = test@gmail.com
Invalid Password = ********

## 5.2 Test Data for Add recipient

Valid add recipient name = shaliza
Valid add recipient nick name = shally
Valid Account Number = 12345678901
Valid IFSC = vdrw0123456
Valid country = India
InValid add recipient name = shaliza !@#
InValid add recipient nick name = shally!@#$
InValid Account Number = 123456
InValid IFSC = vdrw
InValid country = India
**Note** = there can be multiple cases, its just an example .

# 6. Test Scenarios

## 6.1 Login Page

| Test ID | Test Scenario | Steps | Expected Result | Status |
|---------|---------------|-------|-----------------|--------|
| LP-01 | Valid Login | Enter valid email & password, click Login | User successfully logs in | Pending |
| LP-02 | Invalid Login | Enter incorrect credentials, click Login | Error message is displayed | Pending |
| LP-03 | Empty Fields | Leave email/password blank, click Login | Proper validation error displayed | Pending |
| LP-04 | Password Reset | Click "Reset password", enter valid email | Password reset link sent | Pending |
| LP-05 | Google Login | Click "Continue with Google" and complete authentication | User logs in via Google | Pending |

## 6.2 Add Recipient Page

| Test ID | Test Scenario | Steps | Expected Result | Status |
|---------|---------------|-------|-----------------|--------|

| AR-0 1 | Add Valid Recipient | Enter valid name, account number, IFSC, country, submit | Recipient successfully added | Pendin g |
| AR-0 2 | Missing Required Fields | Leave mandatory fields blank, click submit | Error message displayed | Pendin g |
| AR-0 3 | Invalid Account Number | Enter incorrect format for account number | Proper validation error displayed | Pendin g |
| AR-0 4 | IFSC Code Validation | Enter invalid IFSC code, click submit | IFSC validation error appears | Pendin g |
| AR-0 5 | Verify NRE Restriction | Try adding NRE account | Error message displayed | Pendin g |

# 7. Test Execution & Reporting

- Defects will be reported in the bug tracking system like jira.
- Screenshots and logs will be captured for failed test cases.

# 8. Conclusion

This test plan ensures comprehensive testing of the **Login, Logout** and **Add Recipient** functionalities. Any defects found will be reported, and necessary fixes will be re-tested before release.
